

## **Form 6**

### **Structural design data**

(For attaching to the first set of structural drawings)

#### **Data Sheet no. 1**

Job: (Description of Work)

#### **STRUCTURAL FRAMING AND DRAWINGS:**

##### **Description of the Structure:**

- A typical framing plan, showing future horizontal expansion, if any
- B typical cross sections showing the vertical geometry of the structure, showing the vertical Extension and other extra features, if any
- C type of construction: beam and slab/ flat/ slab/ other
- D Structural framing system adopted for lateral loads:
  - 1. Moment resisting frame without shear walls
  - 2. Moment resisting frame without shear walls
  - 3. Box frame

##### **List of Structural Drawings and other reference:**

- 1
- 2
- 3
- 4
- 5
- ...

(Note on the data sheets: The data sheets may be separate or the data may be accommodated on one single drawing. Single sheets documents would be more convenient and handy. However, the choice may be left to the Structural design Consultant.)
