Subject: Suggestions and objections on the CDCPR 2021 from Indian Society of Structural Engineers.

Sir,

Indian Society of Structural Engineers (ISSE) is a premier association of Professional Structural Engineers with its Head Quarters at Mumbai looking after the development of the profession to the benefits of Indian society with the focus on construction industry in particular. We assist Government, Self Government, Municipal Corporations and other corporate bodies in framing their policies for sound and stable structures in their built assets.

We publish a technical journal for free circulation amongst members and complementary to heads of industries. We have published an award winning book on "Design of reinforced concrete structures for earthquake resistance" for the guidance of Professional structural engineers. This deals with practical design aspects as per relevant codes of practice. We have more than 2200+ structural engineers as our members.

On behalf of practicing structural engineers, we would like to present our views and suggestions/ objections on the CDCPR-2021 published by Maharashtra Industrial Development Corporation.

**“ We suggest MIDC to adopt similar form of supervision as per Unified Development Control and Promotion Regulations for entire Maharashtra as per amendment 2 Dec 2021, ( copy enclosed for reference). Since MIDC is a part of Maharashtra Government, similar guidelines should be followed as directed by Govt. of Maharashtra. You may also adopt format of Structural Design Adequacy Certificate as per UDCPR (copy enclosed for reference).”**

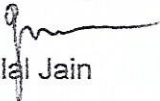

Kindly take a note of above suggestions and make necessary amendments in the Draft CDCPR-2021 of MIDC.

We are enclosing a copy of our ISSE publication listing out the draft certificate formats for your ready reference.

We expect your active cooperation and support in the matter please. We will be happy to help and assist MIDC authorities in any technical matter whenever requested.

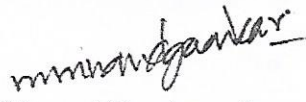

Thanking you.  
Yours truly,

  
Shantilal Jain
